## CAREER OBJECTIVE

Front-End Developer with a proven ability to collaborate effectively with senior developers while spending extra time to be mentored I built a lot of personal projects that increased my experience and helped me develop myself so I am a fast learner and love facing challenges and look forward to joining a work environment where I can be part of its success and same time develop my career path, I am Skilled in React, Redux, Javascript and Eager to learn and use new technologies and tools.

## PROJECTS

### Creative E-Commerce site

#### Designer, Developer

📅 march, 2022 - may, 2022

- Built a full-stack web app to allow users to buy the products from the site
- Used React to allow users to instantaneously update the cart interface without reloading.
- build beautiful and mind-blowing user interfaces and **high-performance component**
- used Redux-Toolkit to store the states and save them in local storage
- used firebase to fetch products and users can see product details

### Personal Blog Site

#### developer, designer

📅 january, 2022 - february, 2022

- used Styled-components to build custom and reusable component
- use Firebase-storage to upload the images
- upload the Article to firebase-firestore and display the content without reloading
- users can write the article in markdown format and the site will convert it to jsx

### Netflix Clone

#### Developer

📅 december, 2021 - january, 2022

- the site has 4 pages in total
- users can see movies and the details using TMDB-API to get data
- build video player using react-youtube
- pixel perfect design almost like Netflix
- build a beautiful vertical scrollbar to view a list of movies
